

Camera system – Insight

The most modern
camera system for
ocean-based fish farming

We have further developed our products for farming in our Insight range. This series consists of the most modern components you can get hold of for your plant. What characterizes the series is ease of use, image quality and robust and maintenance-friendly components.

Camera system – Insight

Our Insight series consists of the following:

Pixelite Insight – Our latest cage camera with crystal clear 4K video even in difficult lighting conditions.

Smart Winch Insight – Smart winch that moves camera to pre-programmed positions at the touch of a button or completely automatically.

Imenco Insight – Our latest software for our systems. Unique experience to control the entire system in an easy-to-use interface. In addition to this, we also have our updated Fish Health Camera which is also available in this series.

Fish Health Insight – Tailored for machine learning, Fish Health Insight uses underwater camera images in aquaculture to count lice, estimate biomass and other machine learning algorithms.
