

# Imenco Fish Welfare cameras

Fish welfare  
and feeding  
camera  
available as a  
Multicamera

Using only the best available modules this camera delivers the best possible underwater images and live video stream for Welfare. Combined with Createview user-friendly software this system gives you a brand new and never seen before overview of your fish.

Building on 30 years' experience of developing high class subsea cameras, Imenco Aqua has now developed the next generation Fish welfare camera, with and feeding and inspection camera and a Fish Welfare camera available as a Multi Camera for the Aquaculture industry.
